

THESE INCISORS ARE ORANGE
DUE TO THE IRON-INFUSED
ENAMEL. BEAVERS HAVE METAL TEETH!

BEAVER'S CHISEL-LIKE
TEETH NEVER STOP
GROWING, REQUIRING
THEM TO GNAW ON
WOOD TO
PREVENT
OVER-
GROWTH.

BEAVERS
ARE
NOCTURNAL
MAMMALS.

BEAVERS HAVE
NICITATING MEMBRANES,
PROTECTIVE THIRD
EYELIDS THAT
ACT AS
TRANSPARENT
SWIMMING
GOOGLES.

you oughta gnaw:

BEAVERS PLAY A CRUCIAL ROLE
AS A KEYSTONE SPECIES BY
ALTERING THE LANDSCAPE INTO
DROUGHT-RESISTANT,
FIRE-RESILIENT HABITATS
THAT PROMOTE BIODIVERSITY.

BEAVERS

A FEW TO
FACTS TO
CHEW ON

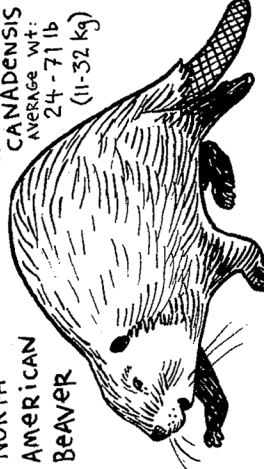

BEAVERS LIVE IN FAMILY
GROUPS, WITH KITS TYPICALLY
STAYING WITH THEIR PARENTS
FOR TWO YEARS. PARENTS SHARE
RAISING RESPONSIBILITIES.

OH DAM! I ALMOST FORGOT
TO INCLUDE THIS PUN.
BY FIONA BARNACLE 2023

BEAVERS ARE LARGE
SEMI-AQUATIC RODENTS
WITH PADDLE TAILS.

NORTH
AMERICAN
BEAVER
CASTOR
CANADENSIS
AVERAGE WT:
24-71 lb
(11-32 kg)

ALTHOUGH THEY ARE
CHARMINGLY CLUMSY
ON LAND, THEY ARE
EXCELLENT SWIMMERS
WITH WEBBED FEET AND
A RUDDER-LIKE TAIL.

BEAVER-DAMMED PONDS
PREVENT THEIR LODGES
FROM WASHING AWAY,
AND PROVIDE PROTECTION
FROM PREDATORS.

BEAVERS ARE EXPERT
BUILDERS. THEY CONSTRUCT
ELABORATE DAMS AND
LODGES USING STICKS,
MUD AND ROCKS.
